Career Objective

I want to establish my carrier in the field of IT. As an engineer, I wish to do make contribution for my country and society through the field that I have chosen. I want to obtain this position within a salary of 45000-55000 base plus Bonus/Commission

Special Qualification

I can work under working environment and working with team members with healthy competition and co-operation will help me to achieve targeted goals. I find myself as a competitive and decisive person.

Major Project On

My major project was on distance education (Learning Together). This project was built on Asp.net Platform with C# as programming language. Through this project I and my team member believed to upgrade the conventional paper-based learning system into a modern Internet based learning methodology.

The project was complete on 6 months period and through this project I myself gained expertise on different technical works. This project was more than academic fulfillment, it was means of learning and gaining more and more knowledge and developing skills towards software development.
